Product Training at Your Office	✓	✗
CPR Certification for 4 People included	✓ \$220 Value	✗

The Powerheart G5 AED is the latest automated external defibrillator model released by Cardiac Science. The AED is designed so that it cannot be accidentally or inappropriately used on another person.

Powerheart G5 is the first AED to combine real-time CPR feedback, fully automatic shock delivery, variable escalating energy and fast shock times.

## Automated External Defibrillator (AED) FACT SHEET

### STATISTICS

- 20,000 Australians suffer a Sudden Cardiac Arrest (SCA) each year.
- The survival rate from Sudden Cardiac Arrest (SCA) without an AED is between two (2) and five (5) per cent.
- If someone's heart stops, you have approximately three (3) to four (4) minutes to get the heart beating again before irreversible brain damage is a real risk.
- For each minute that passes, the chance of survival is reduced by 10 per cent, leaving a 10 minute "window of opportunity".
- In Australia, the average time it takes for an ambulance to arrive is 10-12 minutes. Without an AED present in your workplace, the chance of survival has then dropped to zero (0) per cent.
- If an AED is delivered to a patient within the first minute, the survival rate is 90 per cent.
- Sudden Cardiac Arrest (SCA) does not discriminate against Age, Sex or Race. It can happen to anyone in your workplace or home, at anytime and anyplace.

### FEATURES

- The Powerheart G5 is maintenance free with a highly visible Rescue Ready Indicator confirming the G5 passed rigorous daily, weekly & monthly self-tests.
- Easily updateable settings if Resuscitation Guidelines change.
- 7-year AED warranty.
- Medical-grade battery with a 4 year full operational guarantee and Pads with a 2 year shelf life.
- Light and compact for easy transport (2.5kg with battery and pads).
- GST Free on AED's.
- Durable design tested to military standards and an IP55 rating for protection against dust and water.
- Shock delivery is sent within 10 seconds (typically) post CPR.
- Can be switched to many alternate languages
- Available for purchase with a wide range of accessories including signage, carry bags, AED ready kit and alarmed cabinet.

**The complete AED solution for your workplace, sporting club and public place.**

Remember, what happens in the first few minutes following a sudden cardiac arrest (SCA) can make the difference between life and death. So act quickly and confidently to give a SCA victim the best chance of a favourable outcome.
